# Medical Microdermabrasion & Agera Rx

An effective treatment  
to remove dead skin cells  
and generate skin renewal  
using glycolic peels.

# Medical Microdermabrasion & Agera Rx

Using this simple technique you can look younger and feel fresher with smooth, healthy looking skin.

## What is Medical Microdermabrasion?

Medical Microdermabrasion uses no lasers or chemicals. The treatment involves passing a fine collection of medical grade crystals over the skin's surface using a hand held device. The technique gently removes the dead skin cells and smooths the surface of the skin through a process of exfoliation. The new, living skin cells beneath this top layer are revealed giving a younger, more rejuvenated appearance.

## Agera Rx

Agera Rx skincare and peels are available exclusively through skincare professionals, utilising a combination of peels with advanced peptide technologies and Medical Microdermabrasion. It is possible to target general or more specific skincare concerns. Agera Rx peels remove aged, damaged skin and are virtually painless.

A range of Home Care Products are available from the clinic.

## Is the procedure safe?

The technique of Medical Microdermabrasion is perfectly safe and painless. The treatment has been used to treat millions of patients over the last ten years bringing fantastic results. There are no side effects and it can even be slotted in during your lunch hour!

## How long does it take?

The whole procedure is usually complete within half an hour and results can be seen instantly. Some treatments may take longer depending on the skin condition and the overall required results. For longer lasting overall improved skin appearance, we recommend a course of treatments.

## How many treatments will I need?

You will be advised on the number of treatments required at your first consultation. This will depend on the present condition of your skin, your desired results and your overall health at the time of treatment.

## What skin conditions can be treated with Medical Microdermabrasion?

Medical Microdermabrasion is ideal for diminishing or eliminating the following skin conditions:  
Blackhead or whitehead spots

- Fine lines and wrinkles
- Sun damaged skin
- Acne prone skin
- Superficial age spots
- Hyperpigmentation
- Oily skin
- Dry or patchy skin

## How much will it cost?

The cost will depend on the length and number of treatments and will be discussed at your initial consultation.

## In safe hands

All Medical Microdermabrasion procedures are carried out under the supervision of trained physician Dr Rupert Gabriel (Member of the British Association of Cosmetic Doctors) in the comfort of modern facilities at the Snowberry Lane Clinic in Melksham. Dr Gabriel is a practising GP at the Spa Medical Centre on the same premises and is a fully qualified cosmetic laser surgeon. He is supported by a highly professional nursing team.

Before any procedures are carried out you will receive an initial consultation to discuss the treatment in detail and to ask any questions you may have.

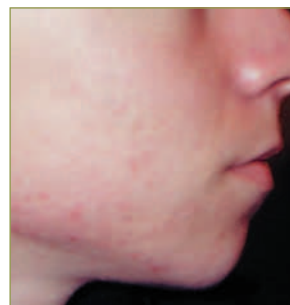

Before treatment of fine lines

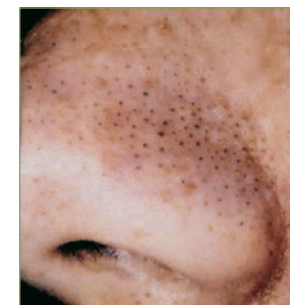

After 6 treatments

Before treatment of acne

After 5 treatments

Before treatment of blocked pores

After 1 treatment

\*In rare cases it may not be practical to use this procedure, in which case you will be advised by the doctor.
