

ACNE AND ROSACEA

Look and feel great by achieving
a clear, radiant complexion.

Snowberry Lane Clinic uses
the latest technology to help
you achieve a smoother, clearer
complexion and noticeably
improve the overall
condition of your skin.

Acne is a common but unpleasant skin condition affecting the face, neck, arms, back, chest and buttocks.

Rosacea is also a type of acne which is an unpleasant skin complaint causing inflammation of the cheeks, nose, chin, forehead, or eyelids.

Fortunately, Snowberry Lane Clinic offers a number of fast and effective treatments to enhance the appearance of your skin.

RECOMMENDED TREATMENTS

COSMETIC LASER SURGERY

Cosmetic laser surgery is a revolutionary, non-invasive procedure suitable for all types and colours of skin. A hand held laser is used to generate heat over the area of skin to be treated, altering the appearance of unsightly marks. There is no need for an anaesthetic and the side effects are minimal.

GLYCOLIC PEELS

Glycolic peels work to reduce the scarring effect of acne. All clients will receive a consultation from a qualified member of our team and a course of treatment will be selected from the diverse line of products to suit your individual needs.

Other treatments available:

- OBAGI • SMARTXIDE • VENUS MICRO-PEEL
- AGERA RX NON-CHEMICAL PEELS
- MEDICAL MICRODERMABARSION
- JAN MARINI

IN SAFE HANDS

The treatment is performed by one of our qualified cosmetic physicians, who will be supported by a team of highly trained professionals dedicated to providing the best possible care before, during and after your treatment.

Call us today to see how we can help boost your confidence and make you look and feel great.
