to see how we can help
boost your confidence and make you
look and feel great.

Achieve the body shape you
have always wanted with
advanced BodyTite technology.
It smoothes away areas of
fat whilst tightening the skin,
leaving an overall slimmer,
more toned body shape.

SNOWBERRY LANE
CLINIC

BodyTite™ Remarkable NEW Tight & Tuck fat reduction treatment

Before

After

HOW DOES THE TREATMENT WORK?

BodyTite is a procedure that effectively melts the fatty tissue being removed, before it is withdrawn via a small incision in an inconspicuous part of the body. It uses patented Radio Assisted Lipo Tightening (RFAL) technology to carefully target the stubborn areas of fat to gently melt them prior to extrusion.

IS IT PAINFUL?

The BodyTite procedure is less painful than alternative fat reduction procedures such as liposuction.

AM I A SUITABLE CANDIDATE FOR BODYTITE?

BodyTite is particularly effective for treatment of older patients, whose skin has become less elastic, new Mums who wish to resume their pre-baby shape, and for anyone who has exercised and lost weight and needs to tighten up loose areas of skin and remove any remaining excess stubborn fat.

Your practitioner will advise you in a consultation whether BodyTite is suitable for you.

HOW LONG DOES THE PROCEDURE TAKE?

The whole procedure is carried out using local anesthetic and takes around 1 hour per area. Results can be seen immediately with best results noticeable after 6-12 weeks.

WHAT AREAS OF THE BODY CAN BE TREATED?

BodyTite is suitable for the abdomen, stomach, thighs, buttocks, knees, upper arms, hips, back and any other areas where excess fat exists.

IN SAFE HANDS

BodyTite is a very safe procedure and is performed by qualified cosmetic physician Dr Rupert Gabriel. He has been practising cosmetic surgery for over 10 years, and is a trainer in Body Contouring.

You will be asked to attend an initial consultation where you will be able to view before and after pictures and ask any questions you may have.
