

LASER HAIR REDUCTION

Say goodbye to shaving, waxing
and tweezing as a solution to
unwanted body hair.

Enjoy silky smooth skin for longer
with Snowberry Lane Clinic's
cosmetic laser technology giving
both men and women the option
of a simple, long-lasting result.

HOW DOES IT WORK?

The heat and energy from the laser is absorbed by the pigment in the hair sitting in the hair follicle. The more pigment the hair has i.e. the darker in colour, the more effective the treatment is.

Before

After

IS IT PAINFUL?

The treatment causes only minimal discomfort – this varies between individuals. If any discomfort is experienced during treatment a topical anaesthetic can be applied to help alleviate this.

IS IT PERMANENT?

Laser hair reduction is a permanent reduction in the regrowth of hair to the treated area.

IN SAFE HANDS

The treatment is performed by one of our qualified cosmetic physicians, who will be supported by a team of highly trained professionals dedicated to providing the best possible care before, during and after your treatment.

As with all procedures carried out at Snowberry Lane Clinic, clients receive an initial consultation to discuss the treatment in detail. The procedure itself is extremely safe, however we do take a full medical history prior to the treatment to ensure any risk is minimised.

So what are you waiting for? Talk to us now and find out how laser hair reduction can help you achieve silky smooth skin and remove unwanted hair painlessly.
